

# Threaded Pipe Fitting Moulds

These fitting moulds are designed for creating threaded plumbing components. The set is suitable for manufacturing pipe fittings used in water supply and drainage systems.

## Product Overview

### Professional Grade Pipe Fitting Moulds

These precision-engineered moulds are designed for the high-volume production of threaded pipe fittings, including elbows, tees, sockets, and valves. Ideal for manufacturing durable PPR plumbing components, they ensure consistent geometry and quality for water supply and drainage systems. Our solutions offer reliable performance for industrial manufacturing requirements.

## Production Details

### Productivity

**60 sets**

Monthly Capacity

**500 sets**

Annual Supply

### Delivery Time

30 Days

### Minimum Order Quantity

1 Set

## Technical Specifications

### Compatible Fittings

- 90-degree elbows
- Tees
- Sockets
- Caps
- Bushings
- Flanges
- Valves
- Clamps

## Logistics

### Place of Origin

China

### Packaging Standard

Wooden case
