Product Overview

Industrial Threaded Pipe Nipples

These threaded pipe nipples are precision-engineered for robust performance and seamless integration in industrial piping systems. Crafted from high-grade carbon steel with a durable sand-blasted surface treatment, they are built for reliability and resistance to wear. Designed with SCH 40 thickness, these fittings ensure secure, leak-free connections for various fluid and gas transfer applications.

Technical Specifications

Material	Carbon Steel
Wall Thickness	SCH 40
Surface Treatment	Sand Blasting
Available Types	Long Nipples, Barrel Nipples, King Nipples, Hose Mander
