

# Threaded Spring Pin for Automotive Chassis

This threaded spring pin is designed for secure and reliable fastening in automobile chassis systems. The robust threaded exterior ensures a tight and vibration-resistant connection.

**Threaded Spring Pin 1372**  
**Product Description:** Threaded 1-3/8"-6 x 7-1/4" Long, Kenworth W900, T-Series Trucks  
Kenworth OEM Number: 5296  
**Cross References:** 327434, 797-327434, 327434PTP, 5296, M5212, SK59-10000, SK59-12000, 5764091, 327-434, B1372-59, ABPN3271436, NCP2745022, 2745022, BSP70-1, BSP701

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Chassis Component

The Threaded Spring Pin 1372 is engineered for secure and reliable fastening within automotive chassis systems. Designed for vibration-resistant performance, this component ensures longevity and stability under demanding operational conditions. Its precise construction allows for easy installation, making it an ideal choice for critical chassis assemblies.

## Technical Specifications

Dimensions	1-3/8"-6 x 7-1/4" Long
Primary Applications	Kenworth W900, Kenworth T-Series
OEM Reference Number	5296
