

Threaded Stem Swivel Caster with Dual Wheels

This swivel caster features a galvanized carbon steel bracket and flexible rotation. The dual wheels ensure smooth movement and are suitable for furniture, toys, and instruments with a load capacity less than 40kg.

Product Overview

Dual-Wheel Mobility Solution

This threaded stem swivel caster is engineered for enhanced stability and smooth movement. Featuring a robust metal housing, it is designed for demanding environments where maneuverability is essential. Its dual-wheel configuration provides a wider footprint, ensuring greater weight distribution and reliable performance across various surfaces.

Technical Specifications

Mounting Type	Threaded Stem
Caster Type	Swivel
Wheel Count	2

Application

Key Features

- Robust metal housing
- Easy screw-in installation
- Dual-wheel stability
- Swivel mechanism for maneuverability

Recommended Use Cases	Furniture, Equipment, Industrial Mobility
