

# Three-Blade Electrical Fan for Air Conditioners

This electrical fan is designed for air conditioners and ventilation equipment. It features a three-blade propeller design optimized for efficient airflow.

## Product Overview

### High-Performance Airflow Solution

This three-blade electrical fan is engineered specifically for air conditioners and ventilation equipment, ensuring optimal air displacement. Its aerodynamically shaped blades are designed to maximize efficiency while minimizing operational noise. Built from durable materials, this component is an ideal choice for both replacement and upgrade applications in household electrical appliances.

## Technical Specifications

### Key Features

- Aerodynamic blade shape
- Noise reduction design
- Secure central hub mounting
- Durable construction

### Performance Focus

**3 qty**  
Blade Count

### Blade Configuration

3 blades

### Application

Air Conditioner, Ventilation Systems, Household Appliances
