

Three-Blade Fan Component

This three-bladed fan component is designed for efficient air circulation. It is constructed from durable plastic and features a central hub for secure motor attachment.

Product Overview

Three-Blade Fan Component

This three-bladed fan component is engineered for optimal air circulation. It is constructed from durable, high-quality plastic and features a central hub designed for secure motor attachment. The aerodynamically optimized blade profile ensures both efficient airflow and quiet operation across various fan models.

Technical Specifications

Number of Blades	3
Material	Durable Plastic
Key Features	Aerodynamically Optimized, Quiet Operation, Central Hub Mount
Compatibility	Suitable for various fan models and applications
