

Three-Dimensional Pantograph Engraving Machine

This three-dimensional pantograph engraving machine is designed for intricate engraving and profiling tasks. It allows for the reproduction of patterns and designs in three dimensions with high accuracy.

Product Overview

Professional 3D Pantograph Engraving System

The XY4235 is a high-precision three-dimensional pantograph engraving machine engineered for intricate profiling and pattern reproduction tasks. Featuring a robust design to minimize vibration, it ensures superior stability during complex operations. This versatile tool is perfectly suited for professional applications in mold making, tool and die production, and detailed artistic engraving.

Technical Specifications

Work Capabilities

- 3D Pattern Reproduction
- Intricate Engraving
- Precision Profiling
- Scaling Adjustments

Model ID

XY4235

Material Compatibility

Compatible Materials

Metals, Plastics, Wood

Design Features

Key Features

High Accuracy • Robust Construction • Adjustable Worktable • Low Vibration

Industry Applications

Industrial Use Cases

- Tool and Die Making
- Mold Making
- Artistic Engraving
