

Three-Disc Plough System for Hand Tractors

This hand tractor accessory features a three-disc plough system designed for efficient soil turning. The implement's adjustable linkage points ensure compatibility with various hand tractor models, enhancing plowing efficiency and reducing soil compaction in agricultural applications.

Product Overview

Three-Disc Plough System

This robustly constructed hand tractor accessory is engineered for efficient soil turning and preparation. It features three independently mounted discs with adjustable angles, allowing for optimal soil engagement and precise furrow formation. Designed for durability, the heavy-duty frame ensures stability, while hardened steel discs provide extended wear resistance across diverse agricultural soil conditions.

Technical Specifications

Number of Discs	3
Material	Hardened Steel
Compatibility Features	Adjustable linkage points, Universal hand tractor compatibility
