

Three-Door Chest Freezer with Adjustable Shelves

This chest freezer features three doors for convenient access and organized storage. It includes adjustable shelves and offers ample space for frozen goods.

Product Overview

Professional High-Capacity Storage

This three-door chest freezer is engineered for maximum storage efficiency and superior thermal retention. Featuring adjustable self-positioning hinges and an ultra-dense high-pressure foam insulation layer, it minimizes cold air leakage while ensuring optimal temperature control. Designed for commercial and residential use, its robust, lockable, and seamless interior construction provides a reliable, easy-to-clean solution for large-scale freezing needs.

Design and Build

Door Mechanism	Three-door design, Adjustable hinges, 30 to 70 degree positioning, Lockable handles
Insulation Technology	Ultra-dense microporous high-pressure foam insulation without vacuoles

Performance Features

Efficiency Highlights

- Reduced air leakage via three-door design
- Oversized airtight door gaskets
- Seamless easy-clean liner
- Anti-leakage protection

Capacity & Space

Large capacity • Space-saving interior • Cold storage optimization
