

Three-Furrow Agriculture Plow

This agriculture machinery implement is designed for efficient soil turning and preparation. The three-furrow plow is engineered for optimal performance in various soil conditions.

Product Overview

Efficient Soil Preparation with the 1LF-325

The 1LF-325 is a robust three-furrow agriculture plow engineered for optimal performance across various soil conditions. Designed for efficient soil turning and aeration, it features a sturdy frame that ensures long-term durability under demanding workloads. This implement is compatible with standard tractor hitches, making it a versatile choice for improving seedbed quality and enhancing crop yields.

Technical Specifications

Key Performance Metrics

3 pcs

Number of Furrows

Model Number

1LF-325

Operational Features

Operational Control

- Adjustable components for precise depth control
- Consistent furrow width adjustment
- Standard tractor hitch compatibility

Functional Benefits

Agricultural Benefits

Soil Aeration • Residue Burial • Seedbed Preparation • Enhanced Yield

Build Quality

Construction Details

- Robust agriculture machinery implement
- Sturdy frame for high durability
- Engineered for demanding workloads
- Designed for various soil conditions
