

Three-Head Advertising Engraving Machine

This advertising engraving machine is equipped with three heads for efficient and precise engraving. It is designed for creating signs, decorations, and other advertising materials.

Product Overview

Industrial Advertising Engraving Solution

This three-head advertising engraving machine is engineered for high-efficiency production, featuring a robust, seamless steel welded structure that ensures excellent stability and resistance to deformation. Designed for versatility, the machine allows for three spindles to operate either synchronously or independently, facilitating flexible processing. With advanced gantry movement and high-precision components, it delivers reliable performance for creating signs, decorations, and various advertising materials.

Technical Construction

Frame Construction	Seamless steel welded structure
Spindle Configuration	Three independent/synchronous spindles
Movement System	Gantry movement

Precision & Transmission

Transmission System

Axis	Technology
X and Y Axes	Rack and Pinion
Z Axis	Imported Ball Screw

Guide Rails	Imported high-precision Taiwan square orbit
-------------	---

Software & Compatibility

Compatible Software	Type3, Artcam, Castmate, Wentai
Process Forecasting	Yes

Certifications

Compliance
CE Certified
