

Three-in-One Bottle Rinsing, Filling, and Capping Machine

This three-in-one machine rinses, fills, and caps bottles for juice and beverage production. It is engineered for hot filling processes to ensure product sterilization and extended shelf life.

Product Overview

Integrated Beverage Bottling Solution

The CGN24R is a high-performance, three-in-one bottling system specifically engineered for the rinsing, filling, and capping of juice and beverage products. Designed for demanding hot filling applications, this integrated unit ensures product sterilization and significantly extends shelf life. Its compact, unified design streamlines production lines by combining essential tasks into a single high-efficiency station.

Key Features

Certifications

CE • CCC

Process Capability

Hot Filling, Rinsing, Filling, Capping

Technical Specifications

Model Number

CGN24R

Primary Industry

Beverage and Juice Production
