

Three-in-One Washing Filling Capping Machine for Juice and Tea

This 3-in-1 hot filling system is designed for processing tea, juice, and functional drinks. It supports PET and glass bottles, providing a streamlined filling, capping, and washing process.

System Overview

High-Efficiency Hot Filling Solution

This 3-in-1 hot filling system is specifically engineered for the production of tea, juice, and functional beverages. It integrates washing, filling, and capping into a single automated process to maximize efficiency and maintain product hygiene. Designed to prevent secondary neck contamination, this system offers high filling precision and reliable capping while minimizing material loss.

Technical Capabilities

Integrated Functions

- Washing
- Hot Filling
- Capping

Compatible Bottle Materials

PET, Glass

Operational Features

Automation Level

High Automation

Changeover Flexibility

Yes

Production Integration

Production Line Integration

Capable of forming a complete production line with other related systems
