

Three-Outlet Power Strip with European Plug

This three-outlet power strip features a built-in switch and a standard European plug. It is designed for indoor use to extend the number of available electrical outlets.

Product Overview

Reliable Power Distribution

This three-outlet power strip is designed for efficient indoor power distribution, featuring a robust construction suitable for various electrical devices and appliances. Equipped with a clearly visible on/off switch, it offers convenient control over your connected equipment. The unit utilizes a standard three-pin European plug, ensuring compatibility with standard regional sockets while prioritizing user safety.
