

Three-Pan Stainless Steel Buffet Server

This buffet server features three pans with individual transparent lids. The stainless steel construction includes a warming drawer underneath.

Product Overview

Professional Buffet Solution

This three-pan stainless steel buffet server is designed to elevate food presentation and temperature maintenance at catered events or buffet lines. Constructed with durable stainless steel, it features individual transparent lids for clear visibility and efficient heat retention. The integrated warming drawer provides additional versatility for keeping food at the perfect serving temperature.
