

Three-Phase Aluminum Housing Induction Motor 0.18kW

This three-phase induction motor features a durable aluminum housing, ensuring efficient heat dissipation. It is designed for various industrial applications requiring reliable power generation.

Overview

High-Efficiency Aluminum Induction Motor

The MSL series three-phase induction motor is engineered for reliable performance in diverse industrial applications. Featuring a durable aluminum housing, this motor ensures efficient heat dissipation and a long service life. It is designed to operate consistently at 50 Hz, offering a robust solution for machinery requiring stable speed and torque.

Technical Specifications

Power Output

0.18 kW
Power

0.25 HP
Horsepower

Electrical Characteristics

Parameter	Value
Voltage	230/400V
Current	1.4/0.8 A
Frequency	50 Hz
Connection	"Y"

Performance & Durability

Protection Rating	IP55
Rotational Speed	1380 r/min
Insulation Class	Class F
Duty Cycle	S1

Compliance

Certifications & Standards	CE, ISO9001
Country of Origin	China
