

Three-Phase Asynchronous Electric Motor

This high-efficiency three-phase induction motor is designed for industrial applications. It features a robust construction, optimized cooling system, and reliable performance.

Product Overview

Industrial Three-Phase Motor

This three-phase asynchronous electric motor is designed for versatile industrial applications requiring continuous operation and high torque output. Featuring a robust die-cast or extruded aluminum alloy housing, the unit adheres to international IEC standards for safety and reliability. Its totally enclosed fan-cooled (TEFC) design ensures optimal thermal management for long-lasting performance in various machinery settings.

Technical Specifications

Compliance Standards

IEC Standard

Housing Material

Die cast or extruding aluminum alloy

Ingress Protection (IP)

IP44, IP54

Cooling Type

Totally enclosed fan cooling

Application

Usage

- Industrial equipment
- General purpose machinery
- Continuous operation environments
