

# Three-Phase Asynchronous Electric Motor B5 Mounted

This three-phase asynchronous motor is designed for various industrial applications. It features a B5 flange mounting configuration for secure and stable installation.

## ADDITIONAL IMAGES

## Overview

### Industrial-Grade Reliability

This AP series three-phase asynchronous electric motor is engineered to meet rigorous international and GOST standards for demanding industrial environments. Featuring a robust construction with a B5 flange mounting, it offers high efficiency and consistent power delivery for continuous duty applications. The use of premium 100% copper windings ensures thermal stability and long-term operational performance.

## Technical Specifications

### Available Mounting Configurations

- B3
- B5
- B35
- B14
- B34

Rated Power Range 0.09 - 315 kW

Efficiency Standards IE1, IE2

## Performance Metrics

### Key Performance Metrics

**11 kW**

Rated Power (example model)

**1460 r/min**

Speed

**22.2 A**

Current

**88.4 %**
