

Three-Phase Asynchronous Motor for Industrial Use

This three-phase asynchronous motor is designed for industrial applications. It features a robust construction with a durable enclosure, suitable for various environmental conditions and engineered for reliable performance and efficient energy consumption.

Product Overview

Industrial Three-Phase Motor

This three-phase asynchronous motor is engineered for high-performance industrial applications. It features a robust, durable enclosure designed to withstand various environmental conditions, ensuring reliable operation over its service life. With a focus on energy efficiency, this unit provides a dependable power solution for diverse machinery, complemented by a standardized design for simple terminal box connectivity and base mounting.

Technical Specifications

Motor Type	Three-phase asynchronous motor
Design Features	Robust construction, Standard shaft, Base-mounted, Industrial grade

Standards and Compliance

Compliance

Industry Standard Safety • Performance Certified
