

Three-Phase Digital Energy Meter

This three-phase electronic energy meter measures electrical energy consumption. It supports 3x220/380V voltage and 3x5(80)A current, operating at 50-60Hz with a pulse output of 800imp/kWh.

Overview

Professional Three-Phase Energy Metering

This three-phase electronic energy meter is engineered for precise electrical energy consumption monitoring in industrial and commercial environments. It features a clear digital display for easy reading and status indicators for phases A, B, C, and neutral. Designed for reliability, this unit supports a wide voltage range and complies with international standards for energy measurement.

Technical Specifications

Pulse Output

800 imp/kWh

Pulse Constant

Voltage Range	3x220/380V
Current Range	3x5(80)A
Frequency	50 Hz

Compliance & Certification

Standards	IEC610:4, CE
-----------	--------------

Features

Display Indicators

- Phase A
- Phase B
- Phase C
- Neutral
- Digital Energy Consumption
