

Three-Phase Electronic Energy Meter

This three-phase electronic energy meter accurately measures energy consumption. It features specifications of 3x220/380V, 50Hz, and 3200imp/kWh.

Overview

Industrial Three-Phase Energy Meter

The DTS188 is a robust three-phase four-wire electronic energy meter designed for precision monitoring in commercial and industrial electrical environments. It features high-accuracy pulse output and clear digital consumption tracking, ensuring reliable data collection for energy management systems. Compliant with established standards, this unit offers a dependable solution for sub-metering and facility energy audits.

Technical Specifications

Voltage Rating	3x220/380V
Rated Current	3x1.5(6)A
Frequency	50 Hz

Performance

Pulse Constant

3200 imp/kWh
Impulse Rate

Compliance Standards	GB/T 17215-2002
----------------------	-----------------

Features

Communication

Infrared Pulse Output

Display Type	Electronic Digital Counter
