

Three-Phase Electronic Energy Meter

This three-phase electronic energy meter is designed for measuring electrical energy consumption. It operates on a 3x220/380V, 50Hz power supply and has an impulse constant of 3200imp/kWh.

Overview

Three-Phase Electronic Energy Meter

The DTS188 type H1 is a professional-grade three-phase four-wire electronic energy meter designed for accurate electrical energy consumption measurement. Engineered for reliability, it operates on a standard 3x220/380V, 50Hz power supply. This device includes advanced features such as pulse, communication, and alarm indicators, along with an integrated infrared communication port for efficient data management.

Technical Specifications

Voltage Rating	3x220/380V
Frequency	50 Hz
Current Rating	3x1.5(6)A
Impulse Constant	3200 imp/kWh

Compliance and Standards

Standards Compliance	GB/T 17215-2002
----------------------	-----------------

Features

Integrated Features

- Pulse indicator
- Communication indicator
- Alarm indicator
- Infrared communication port
