

Three-Phase Electronic Prepaid Energy Meter

This three-phase electronic prepaid energy meter utilizes microelectronics technology and SMT production. Its performance complies with the GB/T 18460.3-2001 standard.

Overview

Advanced Prepaid Metering Solution

The DTSY188 F series is a robust three-phase, four-wire electronic prepaid energy meter utilizing advanced microelectronics and SMT manufacturing processes. Designed for precise electrical energy measurement, it ensures reliability and compliance with national standards. This meter features integrated smart functions including infrared communication, pulse indication, and status alerts for enhanced operational management.

Technical Specifications

Current Rating

1.5 A Base Current	6 A Maximum Current
------------------------------	-------------------------------

Voltage Rating	380 V
Frequency	50 Hz
Pulse Output	3200 imp/kWh

Features

Key Features	Three-Phase, Four-Wire, Prepaid, Infrared Communication, Pulse Indication, Status Alerts
--------------	--

Compliance

Standards Compliance	GB/T 18460.3-2001
