

# Three-Phase Electronic Prepaid Energy Meter

This three-phase prepaid electric energy meter utilizes an advanced measuring chip and digital processing technology. It is designed for accurate measurement of electrical energy consumption.

## Product Overview

### Three-Phase Electronic Prepaid Energy Meter

The DTSY188/DSSY188 is a sophisticated three-phase, four-wire electronic prepaid electric energy meter. It utilizes advanced measuring chips, large-scale integrated circuits, and SMT technology to ensure high-precision digital processing. Designed for reliable energy management, this meter provides accurate consumption tracking and supports prepaid functionality for efficient utility billing.

## Technical Specifications

### Rated Current

**10 A**

Base Current

**40 A**

Max Current

Voltage Rating	380 V
Frequency	50 Hz
Pulse Output	400 imp/kWh

## Standards & Compliance

### Certification Mark

MC

Compliance Standards	GB/T 18460.3-2001
