

Three-Phase Four-Wire Active Energy Meter

This three-phase four-wire active energy meter utilizes long-life technology. It is designed for measuring electrical energy consumption.

Product Overview

High-Precision Energy Measurement

The DT864-B type three-phase four-wire active energy meter is engineered for precise electrical energy monitoring in three-phase four-wire systems. Combining long-life technology with reliable performance, this meter is designed for standard 50Hz AC applications. It provides clear, accumulated energy readings, making it a dependable solution for industrial and commercial energy management.

Technical Specifications

| | |
|----------------------|----------------|
| Voltage Rating | 3x220/380V |
| Current Rating | 3x5(20)A |
| Frequency | 50 Hz |
| Impulse Constant | 200 r/kWh |
| Compliance Standards | GB/T15283-1994 |
