

# Three-Phase Four-Wire Active Energy Meter

This three-phase four-wire active energy meter is designed for precise measurement of electrical energy consumption. Its clear digital display allows for easy reading of kilowatt-hour (kWh) values.

## Overview

### Precision Energy Monitoring

This three-phase four-wire active energy meter is engineered for the precise measurement of electrical energy consumption in diverse environments. Housed in a durable, transparent enclosure, it offers both environmental protection and easy visual inspection of internal components. It is designed to meet rigorous industry standards, making it a reliable solution for residential, commercial, and industrial energy management applications.

## Technical Specifications

### Rated Current

**5 A**

Base Current

**20 A**

Max Current

### Rated Voltage

220 V

### Frequency

50 Hz

### Pulse Constant

3000 imp/kWh

## Compliance and Standards

### Standards Compliance

GB/T17215.321-2008
