

Three-Phase Four-Wire kWh Meter

This static three-phase four-wire kWh meter is designed for measuring electrical energy consumption. It is suitable for 3x230/400V, 20(100)A, 50Hz electrical systems and features a digital display.

Overview

High-Precision Energy Measurement

This static three-phase four-wire kWh meter is engineered for accurate electrical energy monitoring in industrial and commercial environments. Designed for 3x230/400V systems, it offers reliable performance with a 20(100)A current rating. The device features a clear digital display and complies with international standards, ensuring consistent data logging for energy management applications.

Technical Specifications

Pulse Constant

2000 imp/kWh
Pulse Output

System Type	Three-Phase Four-Wire
Rated Voltage	3x230/400V
Current Range	20(100)A
Frequency	50 Hz

Compliance

Device Classification

Static Meter • kWh Meter

Compliance Standards	IEC62053-21
