

# Three-Phase Four-Wire Static Watt-Hour Meter

This three-phase four-wire static watt-hour meter measures electrical energy consumption. It operates at 3x220 (380)V and 3x1.5(6)A, featuring a digital display and an impulse constant of 1600 imp/kWh.

## Product Overview

### High-Precision Energy Measurement

This three-phase four-wire static watt-hour meter is engineered for accurate electrical energy consumption measurement in industrial and commercial environments. Designed for reliability, it features a digital display for clear readings and adheres to established industry standards for performance. Its robust construction ensures consistent operation in demanding electrical systems.

## Technical Specifications

### Voltage Rating

**220 V**

Phase Voltage

**380 V**

Line Voltage

### Current Rating

3x1.5(6)A

### Frequency

50 Hz

### Impulse Constant

1600 imp/kWh

### Model Series

DTS51

## Compliance & Standards

### Accuracy Class

Class B

### Standards

GB/T 17215-2002
