

Three-Phase Magnetic Contactor for Air Conditioning

This three-phase magnetic contactor is designed for circuits up to 660V AC. It is suitable for starting, breaking, and interlocking devices, and can be combined with a thermal relay for electromagnetic starting.

Product Overview

High-Efficiency HVAC Contactor

This three-phase magnetic contactor is engineered for reliable performance in industrial and commercial HVAC&R applications. Designed for high efficiency, it ensures robust control of electrical circuits within air conditioning systems. The unit is compliant with international safety standards, making it a dependable component for long-term operational needs.

Technical Specifications

Model	CJX2-1810
Rated Insulation Voltage (Ui)	660 V
Conventional Thermal Current (Ith)	32 A
Operating Frequency	50Hz, 60Hz

Performance Ratings

AC-3 Utilization Category Ratings

Voltage (V)	Current (A)
220	18
380	18
600	12

Compliance & Standards

Certifications & Standards

IEC60947-4 • GB 14048.4 • ISO9001:2000

Service & Logistics

Order Flexibility

- Samples available for testing
- OEM support available
- ODM support available

Standard Delivery Time

15-20 days after deposit
