

Three-Phase Prepaid Energy Meter

This is a three-phase prepaid electronic energy meter. It is compliant with GB/T18460.3-2001 standard.

Product Overview

Professional Three-Phase Energy Management

This three-phase four-wire electronic energy meter is engineered for precise power consumption monitoring and prepaid billing applications. Designed for industrial and commercial use, it provides reliable measurement accuracy at 3200 impulses per kWh. The unit features robust construction to ensure long-term stability and performance in diverse electrical environments.

Technical Specifications

Key Features

- Three-phase four-wire configuration
- Prepaid metering capability
- High-precision electronic measurement

Voltage Rating	3x220/380V
Current Rating	3x1.5(6)A
Operating Frequency	50 Hz
Pulse Constant	3200 imp/kWh

Compliance and Standards

Standards Compliance	GB/T18460.3-2001
