

Three-Phase Pump Control Box for Motors up to 37kW

This control box enables manual operation of three-phase motors up to 37 kW (50 HP). It is equipped with indicator lamps, voltage meters and a manual control switch.

Product Overview

Professional Pump Control Solution

This three-phase manual pump control box is engineered for reliable operation of electric motors up to 37kW (50HP). Designed for industrial and agricultural applications, it provides essential monitoring and manual control functionality. The unit ensures safe and efficient management for drainage and irrigation machinery.

Technical Specifications

Maximum Motor Power

37 kW

Motor Power

50 HP

Motor Power

Phase Configuration

Three-phase

Features

Key Components

- Manual control switch
- Power indicator lamp
- Running indicator lamp
- Integrated voltage meter

Compliance and Standards

Certifications

GS • CE • RoHS

Applications

Recommended Use

Drainage Machinery, Irrigation Systems
