

# Three-Phase Solar Inverter 15-20kW

This three-phase solar inverter offers a maximum efficiency of over 97% and an ultra-low startup voltage. It features a 7.0" LCD color screen display and IP65 rated for outdoor installation.

## ADDITIONAL IMAGES

## Product Overview

### Industrial-Grade Three-Phase Solar Inverter

This high-performance three-phase string inverter is engineered for commercial and industrial PV plant installations. It features advanced anti-resonance technology and low harmonic distortion to ensure grid compatibility. The system supports seamless integration and parallel connection for large-scale energy harvesting requirements.

## Technical Performance

### Rated Power Output

**15 kW**

Minimum Power

**20 kW**

Maximum Power

### Grid Interaction

Low Harmonic Distortion, Anti-Resonance, Grid-Tied

### Total Harmonic Distortion (THDi)

< 3%

## System Scalability

### Parallel Scaling

6 MW

## Monitoring and Control

### Control Interface

- LCD Display Screen
- Status Monitoring
- Remote Monitoring Capabilities
- Error/Alarm Alerts

### Protection Mechanisms

Voltage Surge Protection • Short Circuit Protection • Fault Protection
