

Three-Phase Static Watt-Hour Meter

The S1300 is a static watt-hour meter designed for three-phase 4-wire and 3-wire electrical systems. It accurately measures electrical energy consumption and provides reliable performance in various industrial and commercial applications.

Product Overview

Industrial Energy Monitoring

The S1300 is a high-precision static watt-hour meter engineered for reliable energy consumption measurement in demanding industrial and commercial environments. Designed for versatility, it supports both three-phase 4-wire and 3-wire electrical systems to ensure seamless integration into existing infrastructure. Its robust static architecture provides long-term stability and accuracy, serving as an essential tool for effective energy management and operational cost control in sectors such as textile and apparel machinery.
