

# Three-Phase Three-Wire Active Energy Meter

The three-phase, three-wire active energy meter utilizes advanced technology for measuring electrical energy. It is designed for long life and is suitable for frequency of 50 Hz.

## Product Overview

### Advanced Three-Phase Energy Metering

The DS904 type is a high-performance three-phase, three-wire active energy meter designed for precise electrical measurement. Utilizing advanced long-life technology, this meter is engineered for reliability in professional energy monitoring applications. It is specifically calibrated for 50 Hz AC systems, ensuring consistent and accurate data collection for industrial or commercial energy management.

## Technical Specifications

### Voltage Rating

**100 V**

Voltage

### Current Rating

**1.5 A**

Rated Current

**6 A**

Max Current

### Meter Configuration

Three-Phase • Three-Wire • Active Energy

### Meter Constant

2000 r/kWh

### Frequency

50 Hz

## Compliance & Standards

### Standards Adherence

GB/T15283-1994
