

Three-Piece Flanged Ball Valve

This three-piece ball valve features flanged connections for secure installation in industrial settings. Constructed from stainless steel and equipped with a blue lever handle, it provides manual control of liquid and gas flow.

Overview

Industrial Three-Piece Flanged Ball Valve

This high-performance three-piece flanged ball valve is engineered for robust industrial flow control. Constructed from durable stainless steel, it is designed to manage the flow of both liquids and gases effectively across diverse process applications. The unit features a manual operation lever, ensuring reliable and intuitive control in demanding environments.

Technical Specifications

Material

Stainless Steel

Valve Construction

Three-piece

Connection Style

Flanged

Operation

Manual lever handle

Applications

Industry Suitability

- General Industrial Processes
- Flow Control Systems

Suitable Media

Liquids, Gases
