Product Overview

Professional Material Handling Solution

These three-point machinery movers are designed for the safe, stable, and efficient transport of heavy industrial equipment. The system features a low-profile design to keep loads close to the ground, minimizing tipping risks while preventing floor damage through the use of high-strength polyurethane wheels. Comprised of a steerable front dolly and an adjustable-width rear transport unit, this setup provides excellent maneuverability in confined spaces.

Technical Specifications

Component Set

- Steerable front transport dolly
- Pulling handle
- Adjustable width rear transport dollies
- Connecting bar

Wheel Material

High-strength polyurethane

Key Performance Indicators

Floor-safe wheels, Low-profile design, Non-slip operation, Adjustable width

Performance Metrics

Product Capacity

36 T

Rated Load Capacity
