

Three-Pole AC Contactor 25A 120VAC

This three-pole AC contactor is rated for 25A at 120VAC. It is suitable for HVAC&R applications and general-purpose switching.

Product Overview

Reliable HVAC Switching Solution

This three-pole definite purpose contactor is engineered for demanding HVAC&R applications, providing robust electrical switching performance. Designed for safety and compliance, the unit features a 24V AC coil and is certified to CUL standards. It is an ideal component for controlling electrical loads in air conditioning, heating, and refrigeration systems.
