

# Three-Pole AC Contactor for HVAC Systems

This three-pole contactor is designed for HVAC applications. It serves as an electrical switch used to control a circuit, typically for starting and stopping motors or other electrical loads in HVAC systems.

## Product Overview

### Three-Pole AC Contactor for HVAC Systems

This three-pole, definite purpose AC contactor is engineered specifically for reliable performance in HVAC applications. Designed to handle electrical loads for motors and compressors, this unit ensures secure connections and stable operation. It is a robust solution for professional HVAC equipment maintenance and installation.

## Electrical Specifications

Rated Voltage	24 V
Rated Current	30 A
Number of Poles	3
Phase	3-phase

## Performance Metrics

### Performance Highlights

<b>30 A</b> Rated Current	<b>24 V</b> Voltage	<b>3 qty</b> Poles
