

Three-Pole RCBO with Overcurrent Protection

This three-pole RCBO provides overcurrent protection for 400V AC systems. It features a C32 tripping characteristic and a sensitivity of 30mA, suitable for industrial and commercial applications.

Product Overview

Three-Pole RCBO Solution

This three-pole residual current circuit breaker with overcurrent protection (RCBO) is engineered for reliable performance in 400V AC electrical systems. It provides comprehensive safety by integrating protection against short circuits, overloads, and earth leakage faults in a single unit. Ideal for demanding industrial and commercial environments, this device ensures operational continuity and enhanced safety standards.

Technical Specifications

Rated Voltage	400 V
Tripping Characteristic	C32
Residual Current Sensitivity	30 mA
Pole Configuration	3-Pole

Key Features

Application Suitability	Industrial • Commercial
Protection Functions	Short Circuit, Overload, Earth Leakage
