Product Overview

Professional Three-Stage Shelling Solution

This three-stage nut shelling machine is engineered for the efficient processing of various hard-shell nuts, including hazelnuts, apricots, and peaches. By utilizing a sophisticated system of hoist feeding, automatic screening, and vibrating screens, it can process three different specifications of nuts simultaneously. Its robust design ensures thorough shell removal while minimizing damage to the kernels, making it an ideal choice for commercial food processing facilities.

Technical Specifications

System Components

- Hoist feeding system
- Automatic screening system
- Vibrating screen composition

Number of Stages

3

Compatible Nuts

Hazelnuts, Apricots, Peaches

Support & Service

Warranty Period

1 year

Maintenance Terms

Lifelong maintenance provided; free replacement parts for design defects within warranty.
