

Three-Tier Industrial Rolling Cage Cart

This industrial rolling cage cart is designed with three levels for efficient warehouse storage. It is equipped with heavy-duty casters for smooth mobility across various industrial environments.

Product Overview

Industrial Rolling Cage Cart

This three-tier industrial rolling cage cart is designed to optimize material handling in textile, laundry, and service industries. It features a robust steel frame with wire mesh sides and back for secure containment, ensuring your goods remain protected during transport. The horizontal 2-hinged half-door design allows for easy access and handling of contents, while heavy-duty casters provide smooth mobility across warehouse and factory floors.

Key Features

Why Choose This Roll Container

- Universal format for diverse use cases
- Protects sensitive goods during transit
- Flexible warehouse storage solution
- Mobile design for efficient material handling
- Eliminates the need for reloading
- Collapsible for space-saving storage when not in use
- Keeps consignments secure and together
- Customizable design based on real usage requirements
