

Three-Wheel Mobility Scooter with Adjustable Seat

This mobility scooter features a three-wheel design for stability and maneuverability. The seat is mounted on a scissor-lift, allowing the user to adjust the height for optimal comfort.

Product Overview

Compact Mobility Solution

This three-wheel mobility scooter is designed for convenience and ease of use, featuring a robust aluminum alloy frame that is fully foldable for transport. Equipped with a 250W motor and a reliable 36V lithium-ion battery, it offers a practical range of up to 40km on a single charge. The adjustable handlebar height and comfortable seating make it an ideal choice for users seeking a flexible and reliable mobility aid.
