

Three-Wheeled Cargo Motorbike

This is a three-wheeled vehicle designed for carrying goods. It features a cargo bed with railing, a driver's seat with backrest, and a windscreen.

Product Overview

Versatile Urban Logistics Solution

This three-wheeled cargo motorbike is designed for efficient, small-scale logistics and goods transport. Featuring a robust rear cargo bed with integrated railings, it provides a stable platform for hauling various items through urban or narrow environments. With a comfortable driver setup including a backrest and windscreen, this vehicle combines practical utility with operator comfort.
