

Three-Wheeled Cargo Tricycle

This three-wheeled motorcycle is designed for transporting cargo. It features a motorcycle-style front end connected to a rear cargo bed with railing.

Overview

Robust Cargo Solutions

This three-wheeled cargo tricycle is engineered for reliable goods transport in commercial and agricultural environments. Featuring a durable motorcycle-style front end and a high-capacity rear cargo bed, it is built to handle substantial loads across diverse terrains. Its gasoline-powered engine ensures consistent performance, making it a practical choice for heavy-duty daily operations.
