

Three-Wheeled Cargo Truck

This three-wheeled truck is designed for transporting cargo. It features a cab with a windshield and a cargo bed with railings.

Overview

Efficiency Meets Utility

This three-wheeled cargo truck is engineered for agile urban transport and short-range delivery tasks. Featuring a robust chassis with a single front wheel and dual rear wheels, it offers superior maneuverability in tight spaces. The enclosed cab provides essential protection for the operator, while the rear cargo bed is equipped with reinforced railings to ensure secure load management.
