

# Three-Wheeled Electric Urban Vehicle

This compact three-wheeled electric vehicle is designed for urban transportation. It features a teardrop-shaped front end, passenger cabin, and roof rack.

## Overview

### Compact Urban Mobility Solution

This three-wheeled electric urban vehicle is engineered for efficient city transportation. Featuring a distinct teardrop-shaped design and an enclosed passenger cabin, it offers a practical balance of comfort and utility. Equipped with essential safety features including headlights, taillights, and side mirrors, this vehicle provides an environmentally friendly alternative for urban commuting and light cargo transport.
