

Three-Wheeled Gas Scooter with Tilting Suspension

This three-wheeled scooter is equipped with a tilting front suspension system. It features a windscreen, a single rear wheel, a comfortable seat, and an internal combustion engine.

Overview

Innovative Stability and Comfort

The CFP-P3 is a specialized three-wheeled gas scooter engineered for superior urban mobility. Featuring an advanced tilting front suspension system, it provides enhanced stability and maneuverability compared to traditional two-wheeled scooters. Designed with the commuter in mind, it includes a comfortable seat, integrated lighting for safety, and a reliable internal combustion engine.
