

Three-Wheeled Motorized Cargo Vehicle

This three-wheeled vehicle is designed for transporting cargo, featuring a 107ml, 4.5kW engine. It has a maximum load capacity of 180kg and is equipped with drum brakes and handlebar steering.

Product Overview

Versatile Cargo Utility

This three-wheeled motorized cargo vehicle is engineered for efficient transport in confined spaces. Powered by a reliable 107ml single-cylinder engine, it offers a practical balance of power and maneuverability for various light-duty logistical tasks. The robust frame and 180kg load capacity make it an ideal choice for short-haul cargo delivery.
