

# Three-Wheeled Passenger Motorcycle

This is a three-wheeled motorcycle designed for passenger transport. It features seating for multiple passengers and a tubular steel frame.

## Overview

### Three-Wheeled Passenger Transport Solution

This three-wheeled motorcycle is engineered specifically for efficient passenger transport in urban and semi-urban environments. It features a robust tubular steel frame and a specialized rear section designed for passenger comfort, complete with armrests and backrests. The configuration includes a dedicated passenger seat between the driver and the rear section, making it an ideal choice for short-haul transport services.
