Product Overview

Through-Wall Climate Solution

This high-performance through-wall air conditioning unit offers a robust solution for localized climate control in commercial and residential settings. Designed for versatility and ease of installation, the unit provides reliable cooling and heating capabilities with low-noise operation. Its standard-size design ensures compatibility with existing building infrastructure while incorporating advanced 3D air flow technology.

Certifications & Compliance

Certifications

AHRI, ETL, DOE

Technical Features

Performance Features

- Low noise operation
- Self-diagnosis system
- 3D air flow technology

Installation & Design

Installation Specs

- Standard industry sizing
- Simplified installation process
- Easy-access filter maintenance
